Background

PNNL operates the HSP, which is a panel of experts who provide expertise and recommendations on hydrogen safety issues; assist with identifying safety-related technical data gaps, best practices and lessons learned; and help integrate safety planning into funded projects to ensure that all projects address and incorporate hydrogen and related safety practices. Panel members are comprised of representatives from government and industry who collectively have over 400 years of cumulative experience. The panel includes representatives from the National Fire Protection Association (NFPA),

American Society of Mechanical Engineers (ASME), Society of Automotive Engineers (SAE), and the International Organization for Standardization (ISO).
