**REVISED NOTICE OF PROPOSED AWARDS****Alternative and Renewable Fuel and Vehicle Technology Program****Grant Solicitation PON-13-607****Hydrogen Refueling Infrastructure – Operation and Maintenance Grants****October 17, 2014**

On November 22, 2013, the California Energy Commission (Energy Commission) released a Grant Solicitation and Application Package entitled “Hydrogen Refueling Infrastructure” under the Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP). This grant solicitation was an offer to fund projects: 1) to develop infrastructure necessary to dispense hydrogen transportation fuel; and 2) to provide needed Operation and Maintenance (O&M) funding to support hydrogen refueling operations prior to the large-scale roll-out of Fuel Cell Vehicles (FCVs). Funding will be provided to construct, upgrade, or support hydrogen refueling stations that expand the network of publicly accessible hydrogen refueling stations to serve the current population of FCVs and accommodate the planned large-scale roll-out of FCVs commencing in 2015.

On March 28, 2014, the Energy Commission issued a Notice of Proposed Awards (NOPA) for O&M support grants to 4 existing hydrogen stations that were operational. The attached “Revised Notice of Proposed Awards,” proposes awarding O&M support grants to 2 additional stations that recently became operational. Additional proposed awards will be announced as eligible O&M funding applicants complete construction and begin operation of the hydrogen refueling station identified in their O&M funding application.

The attached table, “Revised Notice of Proposed Awards,” identifies each applicant selected and recommended for funding and includes the amount of the recommended award. This notice is being mailed to all parties who submitted an application to this solicitation and is also posted on the Energy Commission’s website at:

<http://www.energy.ca.gov/contracts/index.html>.

Funding of proposed projects resulting from this solicitation is contingent upon the approval of these projects at a publicly noticed Energy Commission Business Meeting and execution of a grant agreement.

Questions should be directed to:
