Background

In 2004, the California Public Utilities Commission (CPUC) designated the Energy Commission to be the administrator for the natural gas research funds (Decision 04-08-010). The Energy Commission manages these funds through its Natural Gas Research Program. The workshop will discuss research initiatives across all of the natural gas technical subject areas including: energy efficiency, renewable energy, natural gas infrastructure, natural gas related environmental research, and natural gas related transportation research.

The workshop will be used to gather feedback on the proposed natural gas research initiatives by bringing together utilities, researchers, manufacturers, end users, environmental and consumer representatives, policymakers from state agencies, federal agencies, and other members of the public. Commissioners may also attend the workshop. The results from the workshop will assist Energy Commission staff in developing the proposed natural gas research plan for FY 2016-17. This plan will be presented to the California Public Utilities Commission for final approval.

Oral comments: Staff will accept oral comments during the workshop. Comments may be limited to five minutes per speaker. Any comments may become part of the public record in this proceeding.
